

DISCOVER GLOBAL MARKETS

THE BLUE ECONOMY

A New Age in Ocean Technology, Sustainability, and Logistics

SEPT 20-22, 2022 | PROVIDENCE, RI

Connect With U.S. Suppliers

The United States Department of Commerce's Discover Global Markets: The Blue Economy is a dynamic 3-day business forum focused on bringing together global leaders across the marine renewables, port technology & services, ocean science & technology, and commercial marine sectors (among others). Engage in matchmaking and networking sessions as well as build new business partnerships with U.S.-based executives.

Why Rhode Island?

Rhode Island is centrally located between New York and Boston, part of the densely populated and economically impactful Northeast Corridor of the United States, and is easily accessed by air, rail, and car. It is home to two deep water ports and a wide range of maritime industries, including boat building and servicing; development of advanced materials and component boat/ship systems; defense related ship and submarine building; ocean sciences and engineering; and the first and only working offshore wind farm in the U.S.

Specialized Matchmaking

International executives will be able to pre-schedule one-on-one meetings with leading U.S. companies seeking to expand their international distribution, develop joint venture opportunities and build partnerships.

Site Visits

Site visits are being developed for international executives in and around Rhode Island to learn from top level firms and organizations in the offshore wind, port technology and ocean science areas. Transportation and lunch will be provided during the site visits.

Networking Opportunities

There will be two receptions where international guests can network with U.S. companies. Networking lunches and breaks will also provide an opportunity for guests to informally meet throughout the conference.

Applications Now Being Accepted for International Executives!
